

# Annual report 2024

## International Cooperation

### Emergency relief

In 2024, the focus of our disaster relief was to support conflict-affected populations in **Ukraine, Afghanistan and the Middle East**. In Ukraine, emergency teams provided quick first aid, evacuations, tents, and psychological support after attacks.

### Water and hygiene

In the **Middle East** (Syria, Lebanon) and in **Africa** (Ethiopia, Rwanda), water and hygiene services for refugees, crisis-affected populations, and especially vulnerable persons were expanded further. In Uganda, permanent potable water systems for refugees were installed.

### Social Entrepreneurship

The global REDpreneur academy offers training, mentoring, and networking for setting up social business models. In 2024, an additional module was started in Ukraine which offers support to secure the livelihoods of conflict-affected people as well as organizational development and innovation.

### Health and care

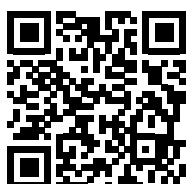

In addition to care programmes in **South-Eastern Europe and South Caucasus**, we focus on the mental health of refugees in Armenia. There is support for improving their livelihoods and a range of psychological services, self-help groups, and leisure activities for adults and children.

### Ambulance service

After six years of development, the Red Cross ambulance service in Rwanda has been integrated into the national health system. People living in rural areas now have significantly better access to emergency and hospital care, e.g. in the case of road accidents or pregnancy complications.
